

Table 3.24 from (2010PU04): References for  ${}^3\text{He}(e, e'd){}^1\text{H}$

References	$E_e$ (MeV)	Comments
(1996TR04)	265.3, 382.5	Detected outgoing e and d; measured cross section; deduced structure function ratio; studied role of isospin in d production
(1998SP08, 2002SP03)	370, 576	Detected outgoing e and d; measured cross section, deduced structure functions; compared with theory; studied reaction mechanism
(1987KE07)	390	Studied both (e, e'p) and (e, e'd); measured cross sections; compared with theory
